

Overview and Use of ED-133A Attachments

The attachments contain 5 files describing the FO interface at different levels:

- One document (IRS annex..) describes the requirements for the SWIM layer
- Two documents describe the IOP layer interfaces: on one hand the data structure that are exchanged, on the other hand the Application interface between IOP and SWIM layer
- Three documents describe the interface at the SWIM level: two describe the web services used for FO management and the associated data structure, one describes the method used in Flight Object distribution through DDS

This is explained in the following diagram:
